

Construction Bulletin

State Route 94 at Steele Canyon Road

March 2002

The next stage of work for the intersection improvements on State Route 94 (SR-94) at Steele Canyon Road will begin the week of March 11. Construction crews will work on new drainage inlets, installing new curbs and gutters and driveways on the north side of the highway.

Temporary concrete barriers will be placed on the north side of State Route 94. During the course of this work, there will be limited access to some areas along the north side of the roadway. Businesses will be open during construction and access is available. There will be an occasional 15-20 minute closure for excavation, paving or striping in the immediate area. Businesses will be notified prior to closures.

Paving will begin in early April and take approximately two weeks to complete. Striping and testing the new signals will take approximately four weeks and will complete this project.

Hours of operation are generally Monday through Friday, 7 a.m. to 3:30 p.m. There may be possible weekend work. Businesses and residence will be notified prior to any changes in the schedule. The estimated completion of this project is mid June, weather permitting.

The recently completed work on the south side of SR-94 included the realignment of the road, installing new curbs and gutters and driveways.

Once completed the project will add a signal and a left turn lane in both directions on SR-94.

Should you have any question or concerns about this project please call Marlene Davis, Construction Information Officer at 619/688-6939 or the Public Information Office at 619/688-2556.
